Professional Summary

Incoming CSE (AI/ML) undergraduate at **IIIT Manipur** with hands-on experience founding and running **Sparclo Media**, an influencer marketing agency, and building multiple real-world AI-powered web applications independently. Skilled in AI-assisted development, prompt engineering, and full-stack project execution — from CRM/ERM systems to public-facing websites. Seeking internship, entry-level, or freelance opportunities to apply and grow these skills further.

Founder Experience

Founder, Sparclo Media (Influencer Marketing Agency) 2025 – Present

Founded and run an influencer marketing agency connecting Indian D2C brands with micro and nano influencers.

Built core business infrastructure: Instagram presence (@sparclo.media), an Excel-based agency tracker, and a structured cold-outreach email system.

Designed a multi-agent automation pipeline (Lead Finder, Outreach, Follow-up, and Daily Summary agents) to streamline lead generation and client follow-ups.

Generated and managed brand and influencer leads through targeted outreach campaigns.

Projects

AI-Powered Consultancy CRM *Personal Project* [🔗 GitHub](#)

Designed and developed an offline CRM for consultancy businesses using AI-assisted development (Claude Code).

Built modules for customer management, lead tracking, document management, follow-ups, and workflow management.

Focused on improving business operations through automation and organized data management.

Employee Relationship Management (ERM) System *Personal Project* [🔗 GitHub](#)

Designed and developed an ERM system for supervisors to manage employee records, attendance, task allocation, and daily workflows.

Built using AI-assisted development (Claude Code).

Improved employee tracking and operational efficiency.

Consultancy Business Website *Personal Project*

Designed and developed a responsive website for a consultancy business.

Included service pages, customer inquiry forms, and lead generation features.

Focused on creating a professional online presence.

AI Requirement Collection & PRD Generator *Personal Project* [🔗 GitHub](#)

Built an AI-powered web application that dynamically asks follow-up questions based on customer responses.

Automatically generates a detailed Product Requirements Document (PRD) for software and web development projects.

Simplifies client requirement gathering and reduces manual documentation effort.

Namrata Textiles – E-Commerce Showcase *Client Project* [🔗 Live App](#)

Designed and developed a luxury 3D immersive e-commerce web application for Namrata Textiles, a textile market business in Surat.

Built WebGL-based procedural silk shaders, an interactive 360° fabric inspector, and a digital lookbook.

Delivered a premium online shopping experience tailored to the textile industry.

River Charitable Foundation – NGO Web Portal *Client Project* [🔗 Live App](#)

Designed and developed the official web portal for River Charitable Foundation, an NGO supporting child rights, education, nutrition, and emergency relief.

Built informational and outreach pages to help the foundation establish a professional public presence.

Focused on accessibility and clear communication of the NGO's mission and impact.

GovConnect – Public Transparency Portal *Personal Project* [🔗 Live App](#)

Built a digital RTI (Right to Information) and government project transparency portal to make public project information easily accessible.

Designed the platform to present government project data and status in a clear, citizen-friendly format.

Focused on promoting transparency and public accountability through technology.

 Education
